

Additional Data File 2. Dot plot analyses of opossum TRB cassettes (C). The dot-matrix analysis corresponds to the comparison of the 51 kb region containing the four TRB D-J-C cassettes aligned to itself. Diagonal lines indicate internal repeats (except the main diagonal line) on the 51 kb analyzed. **a:** Coding and non-coding sequence similarity between TRBC2 and TRBC3 cassettes. **b:** Sequence similarities between exon 1 of TRBC regions.
